

The art of power and perfection

# PNEUMATIC AND HYDRAULIC ACTUATORS SCOTCH YOKE

The art of power and perfection

ACTREG, established in 1992, is a multinational company specializing in the manufacture and sales of high quality actuators for valves requiring a rotary quarter turn movement for either On/Off or modulating duty. The expertise and know how has made ACTREG leader in actuation technology.

ACTREG provides world coverage thanks to the strategic locations of its factories and offices. The international distribution ensures quick availability and more important, personalized service for valve manufacturers, valve stocking distributors and contractors.

ACTUATORS IN  
**29 different sizes**

We are a manufacturer of rack and pinion aluminium housing actuators with torque figures up to 6.500 Nm and scotch yoke actuators for heavy duty service up to 700.000 Nm. Our products offer reliable and dependable automation for ¼ turn valves.

Engineered and built to withstand most of the applications and environmental conditions, the precision in design and quality provides a long and safe operational performance in valve control.

ACTREG has invested in quality assurance, state-of-the-art machining and testing facilities in order to assist customers in safely controlling their processes.

ACTREG engineers are happy to help you with your automation requirements.

## Certificates

ACTREG, S.A. has a Quality Management System certified in accordance with the requirements of ISO 9001:2008 for the design, development, manufacturing and distribution of pneumatic actuators and accessories for valves. Certified by BVQI No. ESPMDD005463.

In accordance with the requirements of pressure equipment directive 97/23/EC, Actreg scotch yoke actuators are classified as follows:

SY01F10 150 up to SY01F14 200 - Category SEP, procedure module H1  
 SY01F14 250 up to SY01F16 350 - Category I, procedure module H1  
 SY01F25 350 up to SY01F40 600 - Category II, procedure module H1  
 SY01F40 700 up to SY01F60 900 - Category III, procedure module H1  
 SY01F60 1000 up to SY01F60 1100 - Category IV, procedure module H1

All ACTREG pneumatic actuators are classified for use in potentially explosive atmospheres as Group II Category 2, suitable for zones 1, 2, 21 and 22 in accordance with Annex VIII of Directive 94/9/CE (ATEX). Technical file is deposited to LCIE, No. LCIE 11 AR 011.

erfection

# MAIN FEATURES & CHARACTERISTICS

**Hydraulic pressure**  
Up to 135 barg (1958 psig)

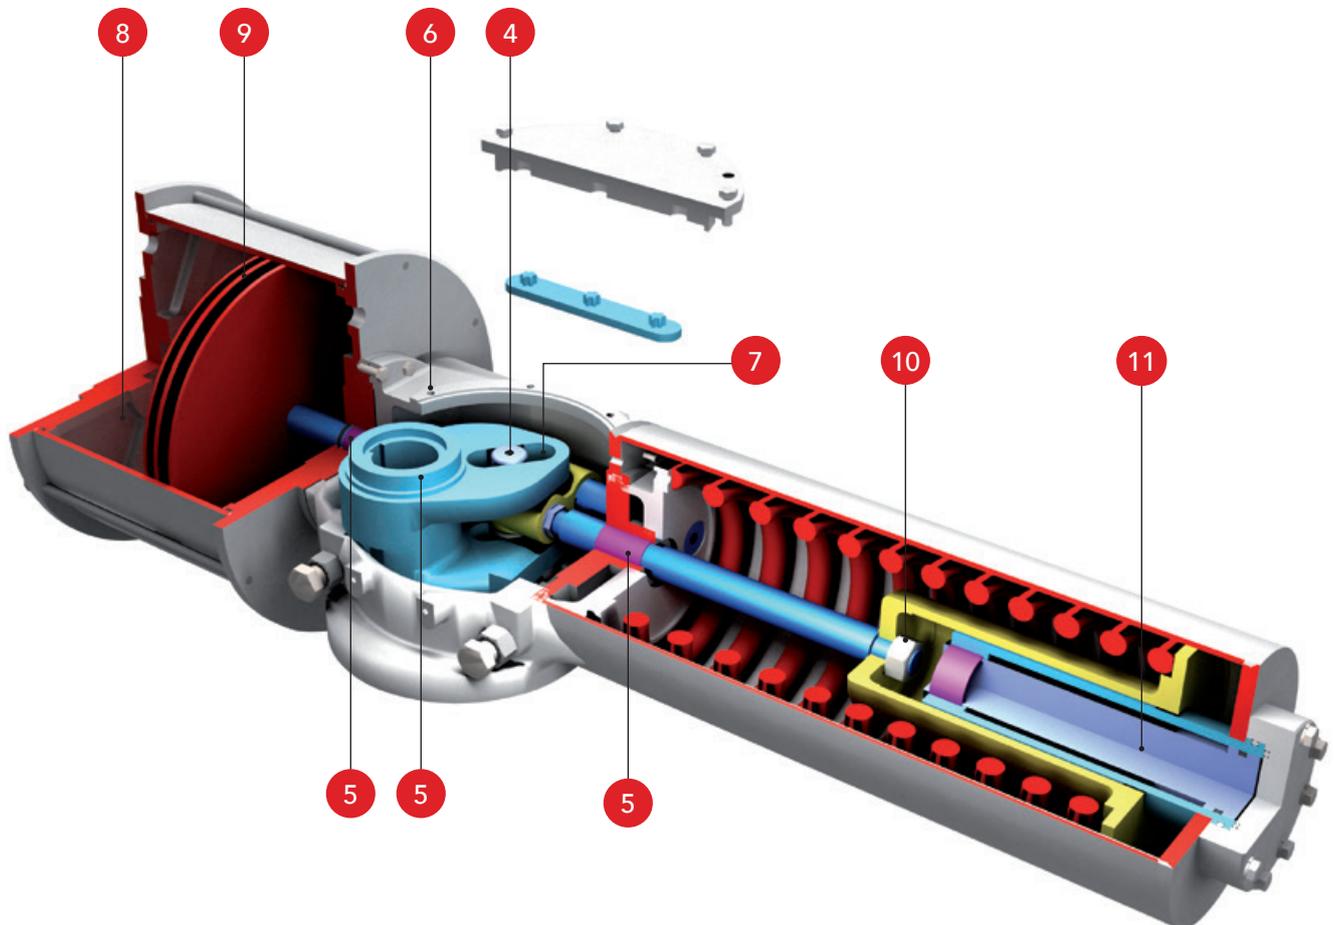

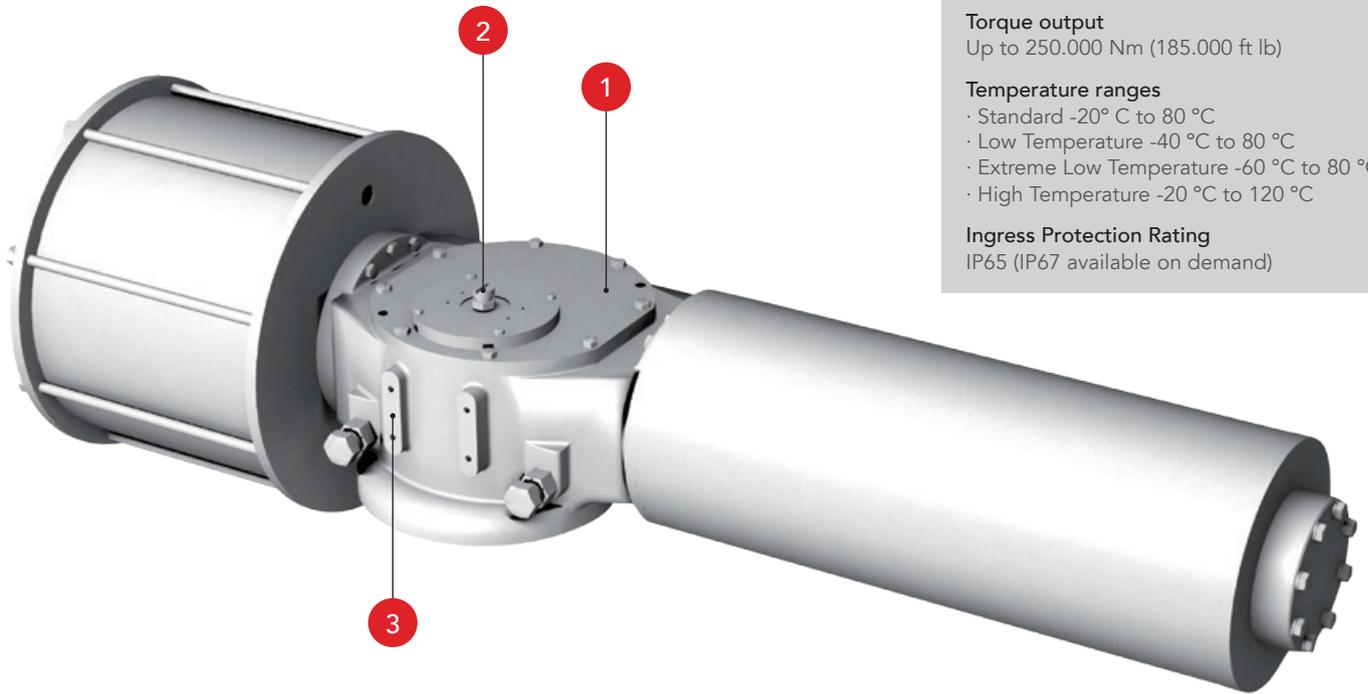

**Pneumatic pressure**  
Up to 8 barg (116 psig)

**Torque output**  
Up to 250.000 Nm (185.000 ft lb)

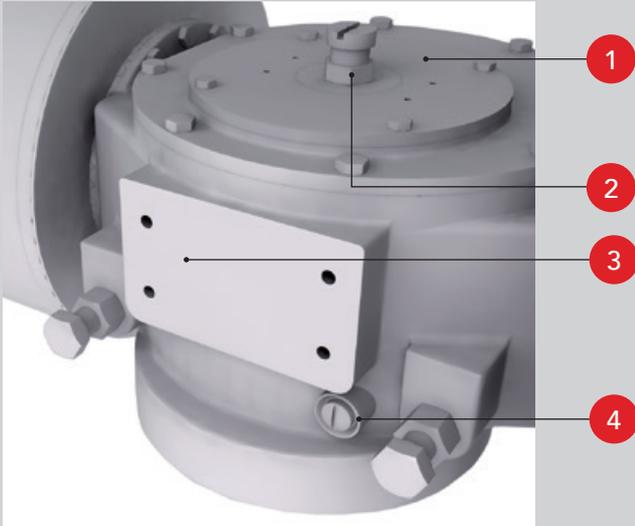

**Temperature ranges**

- Standard -20° C to 80 °C
- Low Temperature -40 °C to 80 °C
- Extreme Low Temperature -60 °C to 80 °C
- High Temperature -20 °C to 120 °C

**Ingress Protection Rating**  
IP65 (IP67 available on demand)

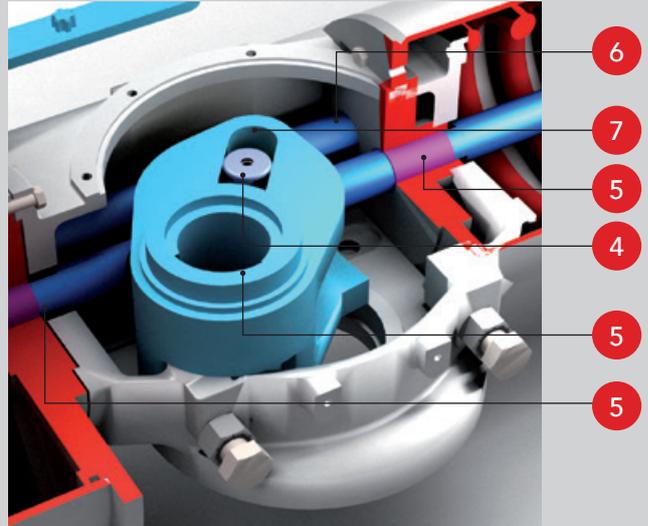

## BODY

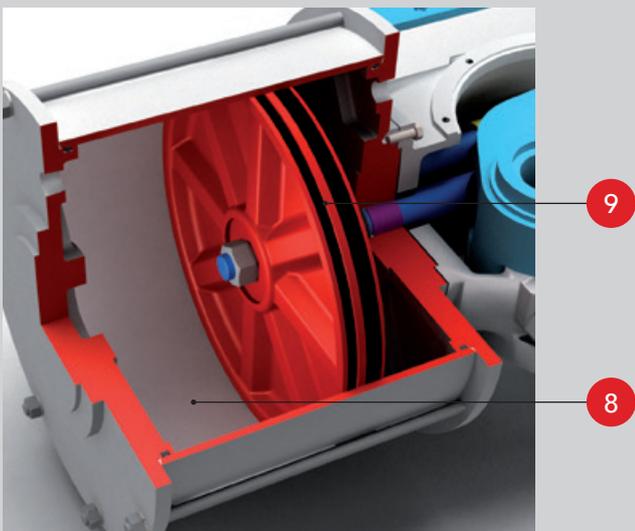

- +** 10 different sizes from F10 (500 Nm) up to F60 (250.000 Nm).
- 1** Internal O-rings to ensure water ingress protection.
- 2** NAMUR standard for all sizes for assembly of switch boxes and positioners.
- 3** Threaded parts in front and the back side of the body for easy assembly of a pneumatic control panel.
- 4** Vent check valve releases overpressure at the center body while preventing the ingress of gas, corrosive elements and water.

## INTERNAL BODY PARTS

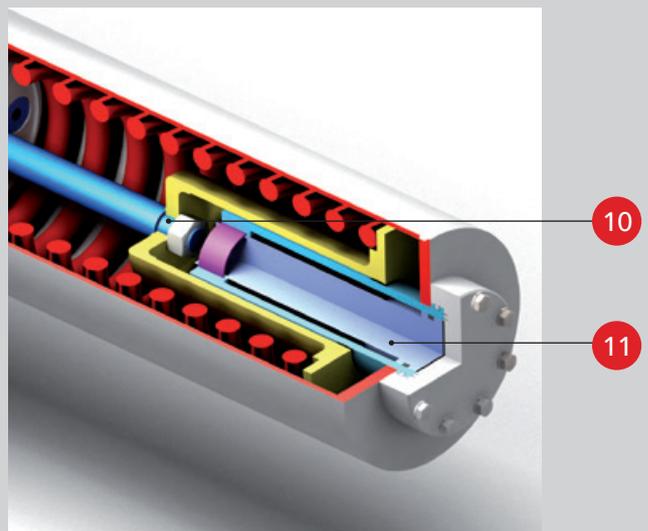

- 4** Roller is used, reducing the friction between the yoke arm and pin, minimizing the wear.
- 5** Replaceable bearings protect the sliding and rotating components, suitable for either dry or lubricated working conditions.
- 6** PTFE thrust bar prevents yoke pin axial movement, transferring axial loads directly to the drive module case.
- 7** Yoke connects the piston rod with the guide block, compensating for side load deflection and reducing wear on rod, bearings and seals.

## PNEUMATIC CYLINDER

- 8 PNEUMATIC CYLINDER**  
The inner surface of cylinder is coated with PTFE, to prevent resistance and self-lubricating.
- 9 PISTONS SEALS**  
Double sealing, with O-ring and dynamic ring to prevent metal to metal contact between the piston and the cylinder.

## SPRING MODULE

- 10** Safe spring Lock, prevents spring module detachment from the drive module.
- 11** Internal Hydraulic cylinder for manual pump override.

# CHARACTERISTICS & FEATURES

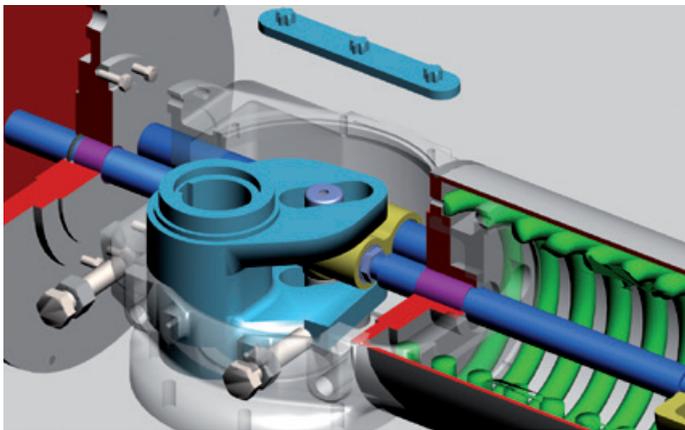

## Versatility

Every ACTREG SY series actuator is built to provide long end efficient service with minimum maintenance. The design, engineering and materials used in their construction ensure optimum performance even in the hardest environments.

Totally enclosed weatherproof centre-body and caps provided with o-rings to ensure the water ingress protection.

The centre-body has a guide that supports transverse forces of the scotch and yoke mechanism and ensures proper alignment of the piston rod.

External travel stop screws allow a precise valve angular stroke adjustment between 80° to 100°.

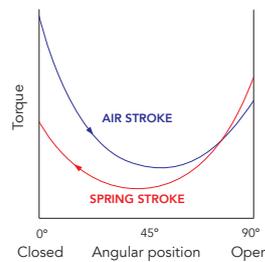

The SY actuators are manufactured in many different combinations of actuator sizes, cylinder diameters, and double or spring return action is available for installation on ¼ turn valves. SY actuators are designed for use over a wide range of pressures or temperatures.

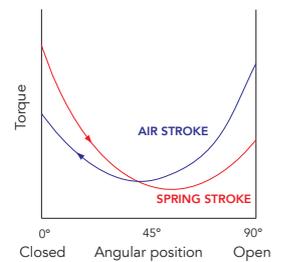

The scotch and yoke mechanism is available in symmetric design offering a more constant torque with minimum cost and weight.

The SY actuator is a modular design. A pneumatic or hydraulic cylinder can be attached, to either side or both sides. With a large stock of finished and semi-finished components always available, actuators can be assembled and supplied with very fast and reliable deliveries.

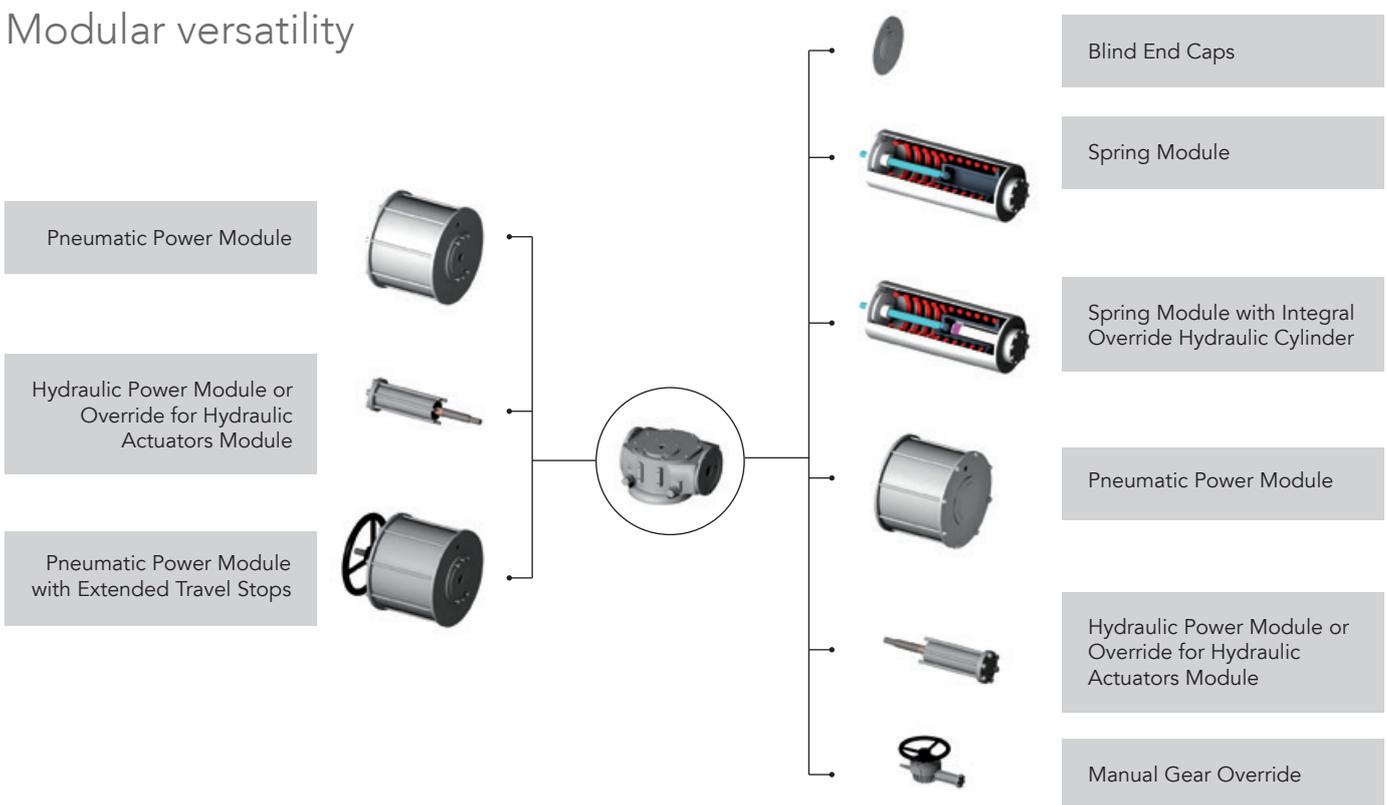

Symmetric yoke mechanism  
Spring to close

Symmetric yoke mechanism  
Spring to open

## Modular versatility

SY series actuators are the module-in design which consists of the different module. The different functions is available in the different combinations.

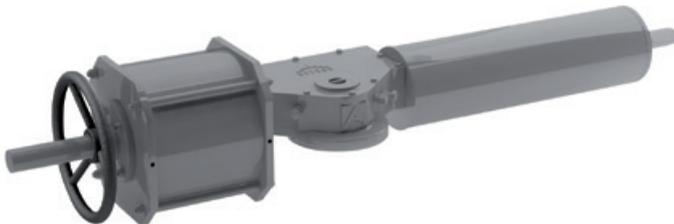

## Manual Override options

The manual override is an important requirement for many valve/actuator applications. In case that air fails, the user will be able to open or close the valve manually.

ACTREG has a variety of override options available to meet any requirement. Available options include jackscrew, hydraulic manual override and sandwich type override. We also offer solutions in tank reservoir systems.

Hydraulic Manual  
Override (HY)

Jackscrew Manual  
Override (HW)

Decutchable Gears Sandwich type

## Control panels and specific solutions

ACTREG has the capability to integrate our actuators in a complete pneumatic and hydraulic control system to cover all the needs that valve automation requirements. Our engineers have a deep knowledge of controls and pneumatic and hydraulic systems.

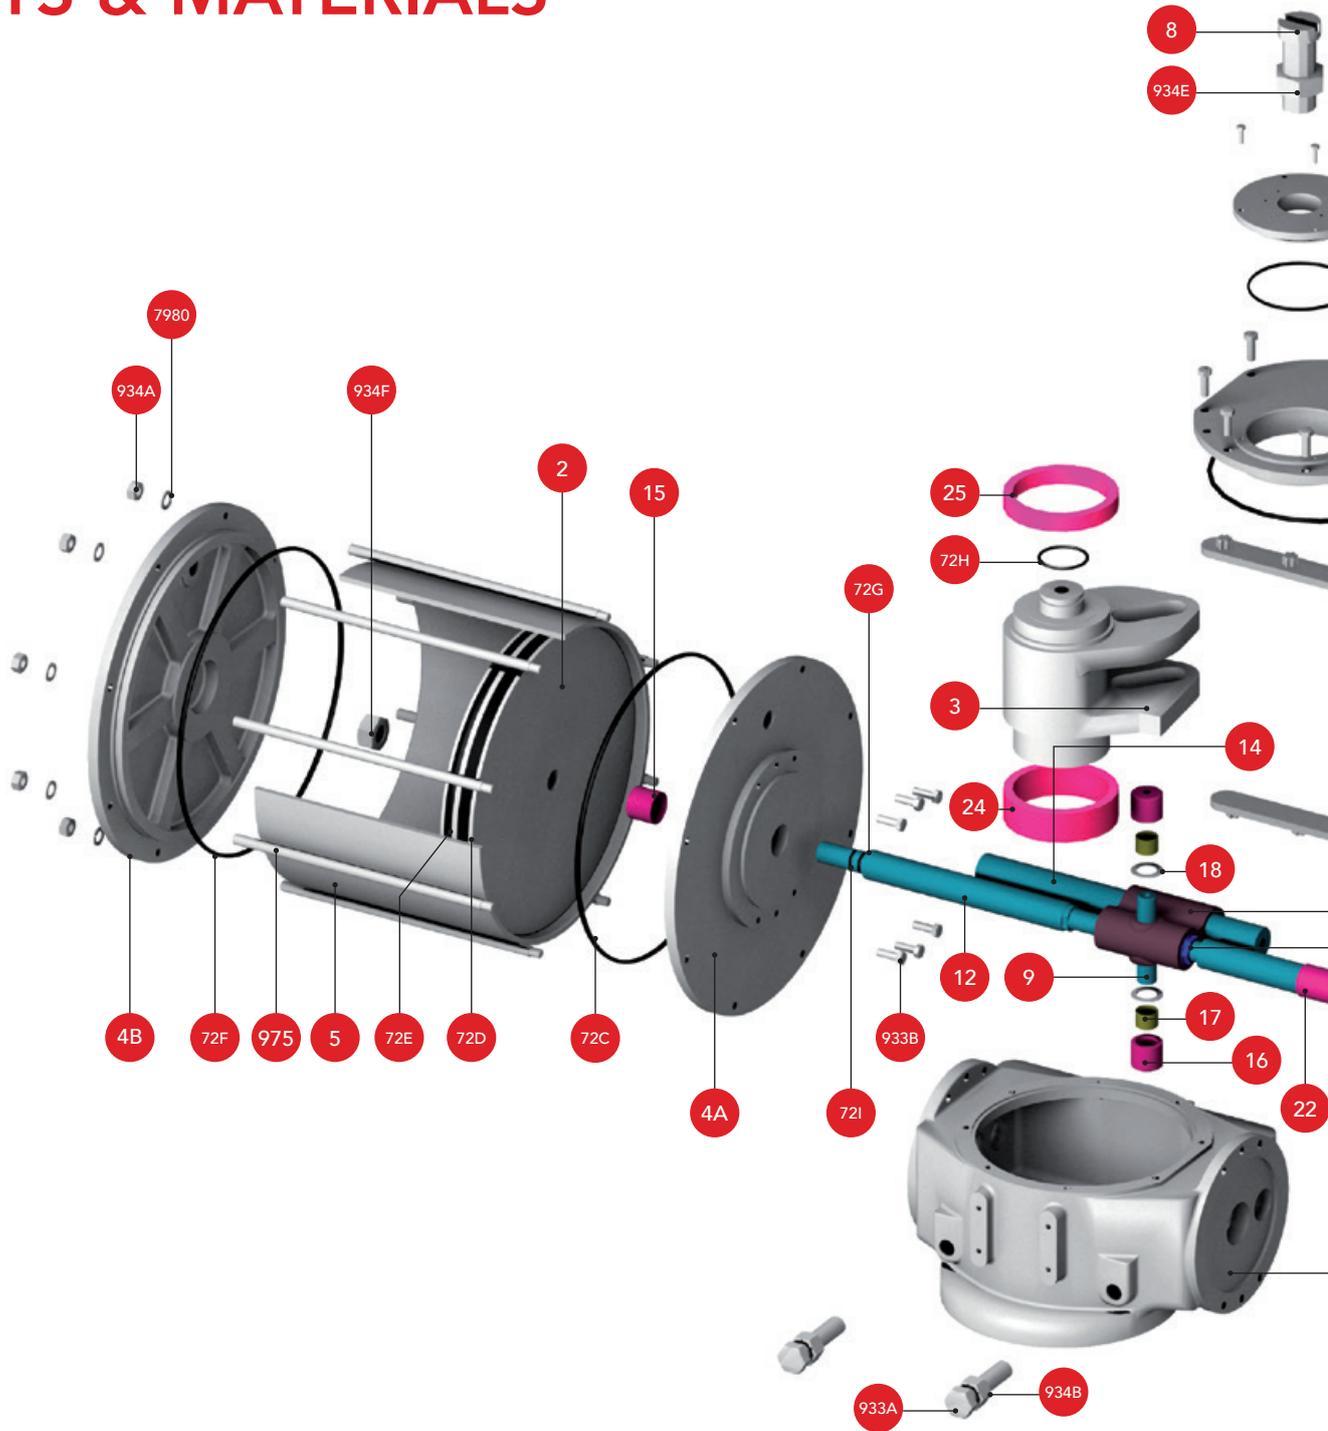

## Passive fire protections

Passive fire protection is a key issue in the safety of hydrocarbon process plants. It is considered a reliable method to reduce plant fire risks. For this matter, ACTREG actuators can be customized to withstand exposure to fire and very high temperatures. A full range of fire proof systems is available, including protective jackets, intumescent coatings and stainless steel enclosure systems.

# OTHER PRODUCTS

## RACK & PINION

- Compact pneumatic actuators.
- Aluminium housing.
- Rack and pinion design.
- Up to 6421 Nm.
- ATEX.
- SIL 3.
- CE.
- VDI/VDE 3845.
- ISO 5211.
- EN-15714.

## DECLUTCHABLE GEAR BOXES

- Aluminium Housing.
- Rugged construction.
- Sealed to IP-65.
- ACTREG's Actuators direct mounting.
- Compact design-low weight.
- Integral top flange.
- User friendly.
- Double adjustment stroke.

## BRACKETS AND COUPLINGS

- Stainless steel, carbon steel or other materials upon request.
- Machined for every kind of valve.

## SWITCH BOXES

- Micromechanical switches or inductive switches.
- Inductive switches for direct mounting.
- ATEX execution.
- Feedback and positioner.

## PNEUMATIC CONTROL DESIGNS

- Solenoid valves, filters, quick exhaust valves, tubing, regulators...
- Line Break systems.
- Emergency shut down systems.
- Design and manufacturing control cabinets.
- Remote control cabinets.

## SPECIAL ACTUATORS

- FIRE-proof.
- Fast acting actuators.
- 100% adjustment stroke actuators.
- Special coatings.
- Special actuators for critical applications.

# ACTREG MOBILE APPLICATION

The all-in-one ACTREG interface is a “must have” for the modern automation valve business. Ideal for work, the ACTREG interface can be used to calculate torques with or without safety factors and allows you to make your own configuration with ACTREG actuators. You can also convert any unit of measurement, dimensions, torques, temperatures, and material equivalences from most common standards.

The sleek, easy-to-use interface makes actuator and torque calculations quick and easy. The user-friendly screen interface lets you see items at-a-glance, allowing you to convert quickly while on-the-go.

We have also included some information about ACTREG and the entire product range. This is a highly effective interface made by ACTREG. Anytime, anywhere, and in any situation.
