Service

Serious communication with customers, providing sustainable services to customers, and taking customers as the center of our production and operation are our core concepts.

Management

Obtained 9001 certification, environmental management system certification, quality management system certification,

Quality

Reliable quality assurance is the foundation of enterprise development, seeking development by quality. Quantity wins the market, which is our firm belief

Credibility

Reputation is the foundation of our enterprise, and the high reputation makes our enterprise gain the recognition and trust of customers.

Seek development with quality

Live by reputation

Creating Benefit by Service

Products

In line with the development of the market, to meet the actual needs of customers, to provide customers with high-quality solenoid valve solutions.

Technology

Obtain the method in the production, obtain the idea in the market, get the demand in the service, long-term technology precipitation, make Our strong

Rigorous design

JHJ

3D design modeling Perfect
prototyping, checking for
accurate kinematics, geometry,
and product conformance to
required specifications and
industrial standards

Maxwell magnetic field analysis,
precise magnetic field analysis
software, provides precise
direction for coil design, so that
the coil power and effect can
achieve the optimal ratio

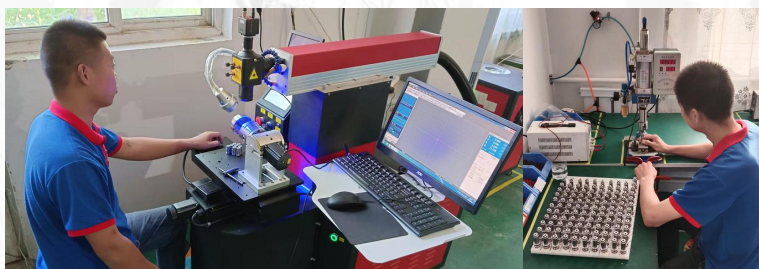

The flow area and pressure peak
value of solenoid valve can be
analyzed effectively by using
Flow Simulation, which is of
great significance to optimize the
structure of solenoid valve

Production and characteristics

JHJ

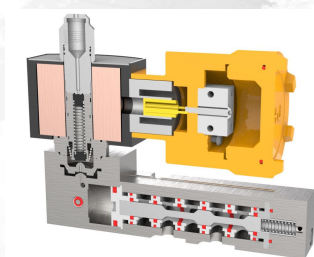

Knowledge-rich, skilled assembly team, so that the solenoid valve products provide a quality assurance, is the solid backing of our JHJ brand.

Solenoid valve testing equipment, after the solenoid valve products are assembled into finished products, each product will undergo ten thousand times of fatigue testing according to batch.

Direct-acting structure, the unique valve core action in the state of equal pressure difference can reduce the starting voltage, and the arc knife-edge sealing surface ensures the sealing reliability. Based on this structure, a variety of valve body structures are derived.

Pilot 2-position 5-way spacer design extends seal life, with MS manual knob.

JHJ

Domestic and
international sales
network is
synchronized.

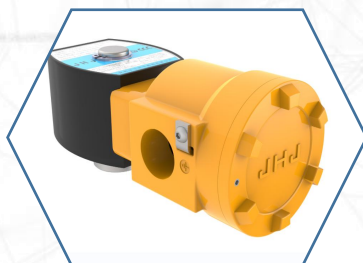

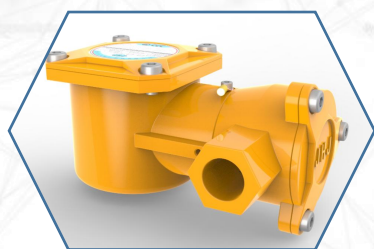

In the torrent of "Made in China", JHJ brand has gradually risen and become a new star of "Made in China". Through long-term development, there are more than 30 enterprises such as PetroChina, Sinopec and various valve companies in direct sales cooperation. At the same time, the agent system and partner system have been established. After seven years of development, there are 12 agents and 10 direct agents. Sales network throughout China, in good faith and the concept of cooperation and reliable quality and adequate supply, agents and partners are also developing rapidly. JHJ's international pace is also synchronized. At present, it has established offices in India and Pakistan, and its products are sold to India, Pakistan and Russia, UK and more than ten other countries.

JHJ

Our Coil

There are seven different coils, with different power, each coil has its own unique characteristics and performance to meet the needs of different conditions.

Low power 1.8W, 3.7W, 10W

Water vapor detection alarm

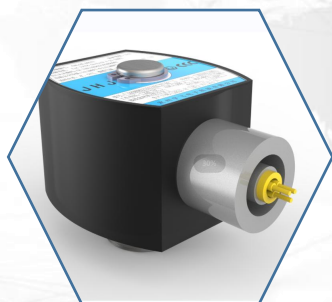

Unique waterproof design with double-chamber structure

Convenient to assemble and disassemble

Stainless steel and aluminum alloy material

Power-off protection and peak overflow element

Built-in anti-surge device

Our Solenoid Valve

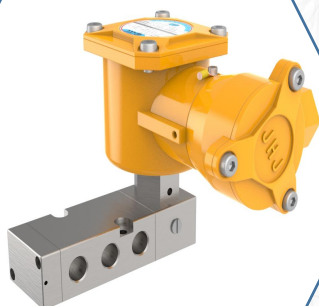

2-position 2-way solenoid valve, stainless steel body, available with a variety of coils, 1.8W low power design

Direct-acting 2-position 3-way, Pressure balance, Valve position indication, Water vapor detection alarm, A manual knob can be configured, 1.8W low power coil

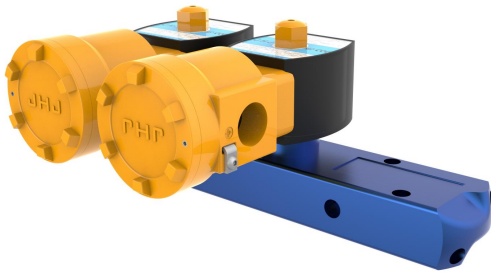

Two-position five-way single electric control, stainless steel valve body, can be matched with a variety of coils
