

product overview

Mokveld provides the gas and oil industry with expert knowledge and highly advanced engineered valve systems for critical control and safety applications.

Safety products

Axial on-off valve (HIPPS)
Balanced piston valves for special applications

Axial check valve
Fast acting non-slam protection for critical applications

Axial surge relief valve
Pilot activated surge protector for liquid applications

Control products

Axial control valve
Streamlined flow path design for demanding applications

Axial choke valve
Symmetrical flow path shaped for erosive applications

Angle choke valve
Versatile heavy duty valves for severe applications

product overview

Subsea products

Subsea axial control valve
For optimum control of subsea processes

Subsea axial check valve
Maintenance free, fast acting non slam protection

Subsea axial on-off valve (HIPPS)
Severe duty on-off valve for quick-acting safety applications

Customer services - complete and professional support

Project engineering services

- Process engineering and system lay-out
- Valve sizing and selection
- Technical information and budget pricing

Operation and maintenance services

- Valve operation and maintenance training
- Commissioning
- 24/7 Field service and support
- Spare parts program

Performance services

- Valve and risk management solutions
- Upgrading, modification and recertification
- Verification and improvement of process performance

Global network - supported locally

Customers can rely on global service and support capabilities.

This enables us to meet your needs, No matter where you are in the world.
